

# Intego

The center of intelligent dentistry

# Every detail speaks to the intelligence behind its creation

Every aspect of the Intego Treatment Center is the result of careful and precise attention to detail. From the premium upholstery to the functionality of the footswitch, the materials were selected not only for their quality and craftsmanship, but also for the way they look and feel. Through a sophisticated synthesis of innovation, style and technology, an Intego-equipped operatory distinguishes any practice as a pioneer among its peers.

# The Intelligence of **integration**

**Intego TS**  
Traditional Delivery  
Available for all Intego models

**Intego CS**  
Continental Delivery  
Available for all Intego models

## Smartly configurable for the way you work

Your workday is complex, and you need a Treatment Center that's up for every challenge. Intego provides the perfect solution to integrate with your workflow: A choice between two models, with flexible configurations designed to meet your needs, each offering optimal performance. The Intego Pro Ambidextrous offers the added benefits of the LEDview™ Plus light and Ergomotion system, with the option to add an integrated sanitation unit.

ApexLocator option is included in the ENDO Function and can be used with our integrated Endo handpiece or with manual instruments using the file clamp.

The integrated torque control is part of the Endo package

## Available features include:

- EasyTouch user interface, allowing complete control of the instrument in use, with a screen showing you what you need when you need it.
- The USB port offers you the possibility to connect your Schick sensor and take x-ray images right at the treatment center with the optional Heliodent Plus intraoral source.
- Integration with Sidexis 4 with direct control through the EasyTouch touch screen.
- Integrated torque control allows you to use your Endodontic file system with the Intego interface, EasyTouch and the T1 Line Endo 6L attachment.
- 22" HD monitor that allows you to explain intraoral and x-ray images, software and planning views, media player files, and PowerPoint presentations to your patients directly at the treatment center.
- A network interface in the patient chair and a USB port in the dentist or assistant element allow you to integrate new functions and network your practice—troubleshooting by your service technician is also much easier.

# The Intelligence of **design**

Always at the ready,  
and everything within reach

Brilliance is the fusion of style and simplicity, the combination of contemporary design components at work, and the connection between you and your patients. From the thoughtful ergonomic features, to the reliable armrests, to the almost visceral elevation system—Intego provides absolute comfort to you and your patients throughout the treatment process.

**Integrated cleaning for automatic purging of instrument hoses and sanitization of water lines.**

**Comprehensive chair functions**

## Ambidextrous delivery system

The Intego delivery system can be located in either the left-handed or right-handed positions in a matter of seconds. The Intego Pro Ambidextrous model also includes Ergomotion and water bottle as standard features, with the option to add the sanitation unit and the LEDview™ Plus light.

## LEDview Plus light

With four different spotlights, seven intensity levels, three color temperature settings, and a cure-safe mode, the LEDview Plus delivers accurate and precise illumination to maximize the view of the oral cavity from any position. A large light field (8" x 4") and a color rendering index above 90 ensures the accurate appearance of shades and colors.

## Smarter today for an even more intelligent tomorrow

Customizable settings allow you to configure Intego exactly the way you need for optimal support of your treatment workflow. Additionally, Intego is fully upgradable, allowing you to add technical options and interfaces so you are ready for future applications. Now that's smart... very smart.

# The intelligence of **experience**

## Patients come in all shapes and sizes, but comfort is universal

The Intego patient chair features an ergonomic design and, together with the headrest, ensures that your patients are especially comfortable. The chair lowers far enough for easy access and the variable foot rest allows taller patients to rest their feet comfortably. The double articulating headrest is quickly adjustable to various treatment situations and patients with different statures.

High quality upholstery enhances comfort even during extended treatments, and the tilting backrest matches the movement of the patient's spine to prevent stretching and compression effects. One thing is certain—patients who realize a comfortable and relaxed experience in the chair feel more secure and remain loyal to your practice.

# Intego equipment options

## Options for the patient chair

2 treatment positions, S and O position	<input checked="" type="checkbox"/>
Number of user-specific settings	4

As the heart of your practice, Intego harmoniously combines appearance and functionality. In addition to its contemporary design, coordinated components, and a variety of upholstery selections, Intego provides optimal access to the patient and smooth treatment workflows with a high level of patient comfort.

#### **LEDview (LEDview Plus for Intego Pro)**

Ideal illumination of the treatment area.

#### **Heliodent Plus**

Readily integrable with Intego, the Heliodent Plus fits into every practice and can be mounted on the wall, Treatment Center, or as a mobile unit.

#### **Double articulating headrest**

Easier to position and allows optimal visibility.

#### **Elevation system**

Gentle chair lift drive accommodates patients up to 407 pounds.

#### **Cuspidor**

Removable and swiveling, easy to clean and easily accessible.

#### **4-way foot switch and advanced electronic foot control**

Regulates up/down movement of chair, and forward/backward movement of backrest. Allows for preset chair positions and some EasyTouch interaction.
